“Idandee naa Parisodhana”

(Collaboration programme of Telugu Research)

Objective of the Programme

Research is a journey with no destination. If you make paths to an imaginary destination, touch the perfumes on the way, and pick up the obstacles, the research is the nectar of the fruit. Research is the churning of a milky ocean. Many kinds of observation, many kinds of analysis, many days of searching, many years of waiting. And then that thought becomes a theoretical essay. All the advice greets you as many doubts arise as a small idea develops into a big theory. Eventually the explorers reach their desired shore. It can lead to degrees. Awards can also be drawn. Anyway, research is a great journey.

There are many researches and many discoveries around us. It would take thousands of hours to read and learn about all of them. But if we want to know about a research in the shortest time, it is possible in the words of the researchers.

It’s a journey formed with the idea that it would be good to have a platform to increase research progress, result and share those experiences, and it would be even better if we could here the gist of the research in the words of the respective researchers. The programme started on 27 February 2022 as collaborative research with the following committee..

Programme organizing Committee

Dr. K. Karuna Sri
D.K.Govt. College for Women(A)
Nellore.

Dr. S.L.V. Umamaheswara Rao
Javahar Navodaya Vidhyalaya
Korea.dt., Chhattisgarh.

Dr. G. Padma Priya
P.R.R. & V.S. Govt. College
Vidavaluru, Nellore.dt.

Programme Outcome

Through this collaborative programme of Telugu research, the research students and faculty have gained knowledge about research methods and the way in which research should be done. Research students have learnt how to do the best research possible. Research students and faculty members learned about the obstacles faced while conducting a great research and how to overcome them and how to collect materials. Research students and faculty members also learned how to arrange footnotes and bibliography.
